Index

Chapter 1

Gazebo Messages Reference

Gazebo uses Google Protobufs for message specification and serialization.

Messages Definitions

Chapter 2

Class Index

2.1 Class List

Here are the classes, structs, unions and interfaces with brief descriptions:

Axis		
	Msgs::Joint axis message	9
BoxGeom		
	Information about a box geometry	9
CameraSensor		
	Information about a camera sensor element	9
Collision		
	Information about a collision element	10
Color		
	Color (p. 10) message	10
Contact		
	Contact (p. 10) message for passing info between two entities	10
Contacts		
	Contacts (p. 10) from collision detection	10
ContactSensor		
	Information about a contact sensor element	11
CylinderGeom		
	Information about a cylinder geometry	11
Entities		
	Information about all entities in a world	11
Factory		
	Message to create new model in gazebo	11
Fog		
	Message for fog data	12
Frction		
	Information about friction	12
Geometry		
	Information about a geometry element	12
GUI		
	Message for a GUI (p. 12)	12
GUICamera		
	Message for a GUI (p. 12) Camera	13
GUIOverlayConfig		
	Message for a gui overlay configuration	13

GzString	A message for string data	13
GzString_V	A message for a vector of string data	13
Header	General information included by many messages	14
HeightmapGeom	Message for a heightmap geometry	14
Image	Message for an image	14
ImageGeom	Message for a image geometry	14
ImageStamped	Message for an image with a time	15
IMU	Data from an IMU (p. 15) sensor	15
Inertial	Information about inertia	15
Int	Integer message	15
Joint	Message for creating joint in rendering::Scene	16
JointAnimation	Message for a model joint animation, does not appear to be used	16
JointCmd	Message for joint command, used by physics::JointControlWidget	16
LaserScan	Data from a laser scan	17
Light	Message for a light	17
Link	Information about a link	17
Material	Information about a material	17
MeshGeom	Message for a mesh geometry	18
Model	Information about a model	18
ModelConfiguration	Message for model configuration (joint positions)	18
Packet	Message that encapsulates another message with a type description	18
Physics	A message containing a description of the global physics properties	19
PID	Message for simple PID (p. 19) controllers	19
PlaneGeom	Message for a plane geometry	19
Plugin	A message containing visual information for gazebo::Plugin	19
Pose	Message for a pose	20
PoseAnimation	Message for a model pose animation	20

PoseStamped	
Message for a pose with a time	20
PoseTrajectory	
Message for a pose trajectory	20
Projector	
Information about a projector	21
Publish	
Message that contains information about a publisher of data	21
Publishers	
A list of publishers	21
Quaternion	
A message for a quaternion	21
RaySensor	
Information about a ray sensor element	22
Request	
A message containing a string request	22
Response	
Message that encapsulates a respons message with a type description	22
Road	
Message for a road	22
Scene	
A message containing a description of a scene	23
Selection	
A message for GUI (p. 12) selection data	23
Sensor	
Information about a sensor element	23
ServerControl	
A message that allows for control of the server functions	23
Shadows	
A message for shadow data	24
Sky	
Information about the sky	24
SphereGeom	
Information about a sphere geometry	24
Subscribe	
A message for subscription data	24
Surface	
Information about a surface element	25
Test	
A test message	25
Time	
A message for time data	25
TopicInfo	
A message for topic information	25
Trackvisual	
Message for a trackking a rendering::Visual with a rendering::Camera	26
Vector2d	
Message for a vector2 double	26
Vector3d	
Message for a vector3 double	26
Visual	
A message containing visual information for rendering::Visual	26
WorldControl	
A message that allows for control of world functions	27

WorldModify	
A message that allows for modifying (open, close) worlds	27
WorldReset	
A message that controls how the world is reset	27
WorldStatistics	
A message statistics about a world	27

Chapter 3

File Index

3.1 File List

Here is a list of all files with brief descriptions:

axis.proto	29

world_modify.proto	77
world_reset.proto	78
world_stats.proto	78

Chapter 4

Class Documentation

4.1 Axis Interface Reference

msgs::Joint axis message

4.1.1 Detailed Description

msgs::Joint axis message

The documentation for this interface was generated from the following file:

- **axis.proto**

4.2 BoxGeom Interface Reference

Information about a box geometry.

4.2.1 Detailed Description

Information about a box geometry.

The documentation for this interface was generated from the following file:

- **boxgeom.proto**

4.3 CameraSensor Interface Reference

Information about a camera sensor element.

4.3.1 Detailed Description

Information about a camera sensor element.

The documentation for this interface was generated from the following file:

- **camerasensor.proto**

4.4 Collision Interface Reference

Information about a collision element.

4.4.1 Detailed Description

Information about a collision element.

The documentation for this interface was generated from the following file:

- **collision.proto**

4.5 Color Interface Reference

Color (p. 10) message.

4.5.1 Detailed Description

Color (p. 10) message.

The documentation for this interface was generated from the following file:

- **color.proto**

4.6 Contact Interface Reference

Contact (p. 10) message for passing info between two entities.

4.6.1 Detailed Description

Contact (p. 10) message for passing info between two entities.

The documentation for this interface was generated from the following file:

- **contact.proto**

4.7 Contacts Interface Reference

Contacts (p. 10) from collision detection.

4.7.1 Detailed Description

Contacts (p. 10) from collision detection.

The documentation for this interface was generated from the following file:

- **contacts.proto**

4.8 ContactSensor Interface Reference

Information about a contact sensor element.

4.8.1 Detailed Description

Information about a contact sensor element.

The documentation for this interface was generated from the following file:

- **contactsensor.proto**

4.9 CylinderGeom Interface Reference

Information about a cylinder geometry.

4.9.1 Detailed Description

Information about a cylinder geometry.

The documentation for this interface was generated from the following file:

- **cylindergeom.proto**

4.10 Entities Interface Reference

Information about all entities in a world.

4.10.1 Detailed Description

Information about all entities in a world.

The documentation for this interface was generated from the following file:

- **model_v.proto**

4.11 Factory Interface Reference

Message to create new model in gazebo.

4.11.1 Detailed Description

Message to create new model in gazebo.

The documentation for this interface was generated from the following file:

- **factory.proto**

4.12 Fog Interface Reference

Message for fog data.

4.12.1 Detailed Description

Message for fog data.

The documentation for this interface was generated from the following file:

- **fog.proto**

4.13 Frction Interface Reference

Information about friction.

4.13.1 Detailed Description

Information about friction.

The documentation for this interface was generated from the following file:

- **friction.proto**

4.14 Geometry Interface Reference

Information about a geometry element.

4.14.1 Detailed Description

Information about a geometry element.

The documentation for this interface was generated from the following file:

- **geometry.proto**

4.15 GUI Interface Reference

Message for a **GUI** (p. 12).

4.15.1 Detailed Description

Message for a **GUI** (p. 12).

The documentation for this interface was generated from the following file:

- **gui.proto**

4.16 GUICamera Interface Reference

Message for a **GUI** (p. 12) Camera.

4.16.1 Detailed Description

Message for a **GUI** (p. 12) Camera.

The documentation for this interface was generated from the following file:

- **gui_camera.proto**

4.17 GUIOverlayConfig Interface Reference

Message for a gui overlay configuration.

4.17.1 Detailed Description

Message for a gui overlay configuration.

The documentation for this interface was generated from the following file:

- **gui_overlay_config.proto**

4.18 GzString Interface Reference

A message for string data.

4.18.1 Detailed Description

A message for string data.

The documentation for this interface was generated from the following file:

- **gz_string.proto**

4.19 GzString_V Interface Reference

A message for a vector of string data.

4.19.1 Detailed Description

A message for a vector of string data.

The documentation for this interface was generated from the following file:

- **gz_string_v.proto**

4.20 Header Interface Reference

General information included by many messages.

4.20.1 Detailed Description

General information included by many messages.

The documentation for this interface was generated from the following file:

- **header.proto**

4.21 HeightmapGeom Interface Reference

Message for a heightmap geometry.

4.21.1 Detailed Description

Message for a heightmap geometry.

The documentation for this interface was generated from the following file:

- **heightmapgeom.proto**

4.22 Image Interface Reference

Message for an image.

4.22.1 Detailed Description

Message for an image.

The documentation for this interface was generated from the following file:

- **image.proto**

4.23 ImageGeom Interface Reference

Message for a image geometry.

4.23.1 Detailed Description

Message for a image geometry.

The documentation for this interface was generated from the following file:

- **imagegeom.proto**

4.24 ImageStamped Interface Reference

Message for an image with a time.

4.24.1 Detailed Description

Message for an image with a time.

The documentation for this interface was generated from the following file:

- **image_stamped.proto**

4.25 IMU Interface Reference

Data from an **IMU** (p. 15) sensor.

4.25.1 Detailed Description

Data from an **IMU** (p. 15) sensor.

The documentation for this interface was generated from the following file:

- **imu.proto**

4.26 Inertial Interface Reference

Information about inertia.

4.26.1 Detailed Description

Information about inertia.

The documentation for this interface was generated from the following file:

- **inertial.proto**

4.27 Int Interface Reference

Integer message.

4.27.1 Detailed Description

Integer message.

The documentation for this interface was generated from the following file:

- **int.proto**

4.28 Joint Interface Reference

Message for creating joint in rendering::Scene.

4.28.1 Detailed Description

Message for creating joint in rendering::Scene.

Joint (p. 16) wrench message.

The documentation for this interface was generated from the following file:

- **joint.proto**

4.29 JointAnimation Interface Reference

Message for a model joint animation, does not appear to be used.

4.29.1 Detailed Description

Message for a model joint animation, does not appear to be used.

The documentation for this interface was generated from the following file:

- **joint_animation.proto**

4.30 JointCmd Interface Reference

Message for joint command, used by physics::JointControlWidget.

4.30.1 Detailed Description

Message for joint command, used by physics::JointControlWidget.

The documentation for this interface was generated from the following file:

- **joint_cmd.proto**

4.31 LaserScan Interface Reference

Data from a laser scan.

4.31.1 Detailed Description

Data from a laser scan.

The documentation for this interface was generated from the following file:

- **laserscan.proto**

4.32 Light Interface Reference

Message for a light.

4.32.1 Detailed Description

Message for a light.

The documentation for this interface was generated from the following file:

- **light.proto**

4.33 Link Interface Reference

Information about a link.

4.33.1 Detailed Description

Information about a link.

The documentation for this interface was generated from the following file:

- **link.proto**

4.34 Material Interface Reference

Information about a material.

4.34.1 Detailed Description

Information about a material.

The documentation for this interface was generated from the following file:

- **material.proto**

4.35 MeshGeom Interface Reference

Message for a mesh geometry.

4.35.1 Detailed Description

Message for a mesh geometry.

The documentation for this interface was generated from the following file:

- **meshgeom.proto**

4.36 Model Interface Reference

Information about a model.

4.36.1 Detailed Description

Information about a model.

The documentation for this interface was generated from the following file:

- **model.proto**

4.37 ModelConfiguration Interface Reference

Message for model configuration (joint positions)

4.37.1 Detailed Description

Message for model configuration (joint positions)

The documentation for this interface was generated from the following file:

- **model_configuration.proto**

4.38 Packet Interface Reference

Message that encapsulates another message with a type description.

4.38.1 Detailed Description

Message that encapsulates another message with a type description.

The documentation for this interface was generated from the following file:

- **packet.proto**

4.39 Physics Interface Reference

A message containing a description of the global physics properties.

4.39.1 Detailed Description

A message containing a description of the global physics properties.

The documentation for this interface was generated from the following file:

- **physics.proto**

4.40 PID Interface Reference

Message for simple **PID** (p. 19) controllers.

4.40.1 Detailed Description

Message for simple **PID** (p. 19) controllers.

The documentation for this interface was generated from the following file:

- **pid.proto**

4.41 PlaneGeom Interface Reference

Message for a plane geometry.

4.41.1 Detailed Description

Message for a plane geometry.

The documentation for this interface was generated from the following file:

- **planegeom.proto**

4.42 Plugin Interface Reference

A message containing visual information for gazebo::Plugin.

4.42.1 Detailed Description

A message containing visual information for gazebo::Plugin.

The documentation for this interface was generated from the following file:

- **plugin.proto**

4.43 Pose Interface Reference

Message for a pose.

4.43.1 Detailed Description

Message for a pose.

The documentation for this interface was generated from the following file:

- **pose.proto**

4.44 PoseAnimation Interface Reference

Message for a model pose animation.

4.44.1 Detailed Description

Message for a model pose animation.

The documentation for this interface was generated from the following file:

- **pose_animation.proto**

4.45 PoseStamped Interface Reference

Message for a pose with a time.

4.45.1 Detailed Description

Message for a pose with a time.

The documentation for this interface was generated from the following file:

- **pose_stamped.proto**

4.46 PoseTrajectory Interface Reference

Message for a pose trajectory.

4.46.1 Detailed Description

Message for a pose trajectory.

The documentation for this interface was generated from the following file:

- **pose_trajectory.proto**

4.47 Projector Interface Reference

Information about a projector.

4.47.1 Detailed Description

Information about a projector.

The documentation for this interface was generated from the following file:

- **projector.proto**

4.48 Publish Interface Reference

Message that contains information about a publisher of data.

4.48.1 Detailed Description

Message that contains information about a publisher of data.

The documentation for this interface was generated from the following file:

- **publish.proto**

4.49 Publishers Interface Reference

A list of publishers.

4.49.1 Detailed Description

A list of publishers.

The documentation for this interface was generated from the following file:

- **publishers.proto**

4.50 Quaternion Interface Reference

A message for a quaternion.

4.50.1 Detailed Description

A message for a quaternion.

The documentation for this interface was generated from the following file:

- **quaternion.proto**

4.51 RaySensor Interface Reference

Information about a ray sensor element.

4.51.1 Detailed Description

Information about a ray sensor element.

The documentation for this interface was generated from the following file:

- **raysensor.proto**

4.52 Request Interface Reference

A message containing a string request.

4.52.1 Detailed Description

A message containing a string request.

The documentation for this interface was generated from the following file:

- **request.proto**

4.53 Response Interface Reference

Message that encapsulates a respons message with a type description.

4.53.1 Detailed Description

Message that encapsulates a respons message with a type description.

The documentation for this interface was generated from the following file:

- **response.proto**

4.54 Road Interface Reference

Message for a road.

4.54.1 Detailed Description

Message for a road.

The documentation for this interface was generated from the following file:

- **road.proto**

4.55 Scene Interface Reference

A message containing a description of a scene.

4.55.1 Detailed Description

A message containing a description of a scene.

The documentation for this interface was generated from the following file:

- **scene.proto**

4.56 Selection Interface Reference

A message for **GUI** (p. 12) selection data.

4.56.1 Detailed Description

A message for **GUI** (p. 12) selection data.

The documentation for this interface was generated from the following file:

- **selection.proto**

4.57 Sensor Interface Reference

Information about a sensor element.

4.57.1 Detailed Description

Information about a sensor element.

The documentation for this interface was generated from the following file:

- **sensor.proto**

4.58 ServerControl Interface Reference

A message that allows for control of the server functions.

4.58.1 Detailed Description

A message that allows for control of the server functions.

The documentation for this interface was generated from the following file:

- **server_control.proto**

4.59 Shadows Interface Reference

A message for shadow data.

4.59.1 Detailed Description

A message for shadow data.

The documentation for this interface was generated from the following file:

- **shadows.proto**

4.60 Sky Interface Reference

Information about the sky.

4.60.1 Detailed Description

Information about the sky.

The documentation for this interface was generated from the following file:

- **sky.proto**

4.61 SphereGeom Interface Reference

Information about a sphere geometry.

4.61.1 Detailed Description

Information about a sphere geometry.

The documentation for this interface was generated from the following file:

- **spheregeom.proto**

4.62 Subscribe Interface Reference

A message for subscription data.

4.62.1 Detailed Description

A message for subscription data.

The documentation for this interface was generated from the following file:

- **subscribe.proto**

4.63 Surface Interface Reference

Information about a surface element.

4.63.1 Detailed Description

Information about a surface element.

The documentation for this interface was generated from the following file:

- **surface.proto**

4.64 Test Interface Reference

A test message.

4.64.1 Detailed Description

A test message.

The documentation for this interface was generated from the following file:

- **test.proto**

4.65 Time Interface Reference

A message for time data.

4.65.1 Detailed Description

A message for time data.

The documentation for this interface was generated from the following file:

- **time.proto**

4.66 TopicInfo Interface Reference

A message for topic information.

4.66.1 Detailed Description

A message for topic information.

The documentation for this interface was generated from the following file:

- **topic_info.proto**

4.67 Trackvisual Interface Reference

Message for a tracking a rendering::Visual with a rendering::Camera.

4.67.1 Detailed Description

Message for a tracking a rendering::Visual with a rendering::Camera.

The documentation for this interface was generated from the following file:

- **track_visual.proto**

4.68 Vector2d Interface Reference

Message for a vector2 double.

4.68.1 Detailed Description

Message for a vector2 double.

The documentation for this interface was generated from the following file:

- **vector2d.proto**

4.69 Vector3d Interface Reference

Message for a vector3 double.

4.69.1 Detailed Description

Message for a vector3 double.

The documentation for this interface was generated from the following file:

- **vector3d.proto**

4.70 Visual Interface Reference

A message containing visual information for rendering::Visual.

4.70.1 Detailed Description

A message containing visual information for rendering::Visual.

The documentation for this interface was generated from the following file:

- **visual.proto**

4.71 WorldControl Interface Reference

A message that allows for control of world functions.

4.71.1 Detailed Description

A message that allows for control of world functions.

The documentation for this interface was generated from the following file:

- **world_control.proto**

4.72 WorldModify Interface Reference

A message that allows for modifying (open, close) worlds.

4.72.1 Detailed Description

A message that allows for modifying (open, close) worlds.

The documentation for this interface was generated from the following file:

- **world_modify.proto**

4.73 WorldReset Interface Reference

A message that controls how the world is reset.

4.73.1 Detailed Description

A message that controls how the world is reset.

The documentation for this interface was generated from the following file:

- **world_reset.proto**

4.74 WorldStatistics Interface Reference

A message statistics about a world.

4.74.1 Detailed Description

A message statistics about a world.

The documentation for this interface was generated from the following file:

- **world_stats.proto**

Chapter 5

File Documentation

5.1 axis.proto File Reference

Variables

- message **Axis**
- required double **damping** = 6
- required double **friction** = 7
